SUMMARY

Sales/Solutions Engineer with 8+ years in customer-facing technical roles across enterprise pre-sales and full-stack engineering. Partnered with AEs on \$150k–\$750k opportunities, delivering discovery -> solution design -> tailored demos and rapid POV/POCs. Known for AWS + IaC POC automation, AI product positioning, and leading enterprise procurement (RFPs, SOC 2, FERPA) by translating complex requirements into clear ROI and technical proof.

WORK EXPERIENCE

SALES SOLUTIONS ENGINEER | Everspring Partners (Remote) | Dec 2020 - Present

- Partner with AEs on \$150k–\$750k enterprise opportunities; deliver discovery -> solution design -> tailored demos that reduced evaluation cycles 45 -> 28 days and increased close rates by ~30%.
- Deliver ~10–20 customer demos per month and support ~6–12 deals per quarter, balancing parallel cycles while maintaining high demo quality and strong follow-through.
- Execute ~8–15 POV/POCs per year, translating buyer requirements into scoped technical proofs, success criteria, and executive-ready outcomes.
- Spearheaded rollout of VIA (AI-powered learning automation) — built demo environments and presented technical proof-of-value to accelerate evaluations and stakeholder alignment.
- Built AWS infrastructure-as-code pipelines to launch POC environments in <1 hour, increasing repeatability and shortening time-to-proof in evaluations.
- Authored ~12 enterprise RFPs/security questionnaires per year (SOC 2, FERPA), maintaining a 100% pass rate across 12 enterprise bids through reusable artifacts and buyer-aligned responses.
- Translated complex prospect needs (e.g., accessibility, analytics/data insights) into architecture recommendations and ROI decks, contributing to two of the firm's largest enterprise wins in 2025.

SENIOR SOFTWARE ENGINEER | UHaul Amerco (Phoenix, AZ) | Feb 2019 - Dec 2020

- Full-stack engineer supporting Truck Sales: shipped end-to-end features across React front-end and Java services, including integrations and production delivery in a high-visibility business area.

SOFTWARE ENGINEER | BBVA USA Bank (Birmingham, AL) | Nov 2015 - Feb 2019

- Full-stack engineer on Online Banking and OAO (Online Account Origination): built secure customer flows (including account opening) using Java, Spring, Spring Web Flow, with front-end work in jQuery and AngularJS.

PROJECTS

Talk2Me — Accessible Learning Platform (Nonprofit Partner) | Product + Engineering Lead | talk2meapp.org

Built a responsive web/mobile platform integrating Canvas LMS (LTI + REST APIs) with SMS OTP authentication (Twilio Verify), personalized learning paths, and progress analytics with coach/admin oversight. Owned product, architecture, and delivery: designed AWS infrastructure (Amplify, S3/CloudFront, Lambda/API Gateway, RDS/DynamoDB) and CI/CD across environments; implemented Tile/Progress views and multi-tenant reporting with HIPAA-aligned, privacy-forward data handling.

Club Swan — Prepaid Card -> NFT "Digital Twin" System | Technical Lead / Hands-on Engineer

Co-led architecture to link prepaid card purchases to ERC-721 NFT minting (Ethereum), evaluating platforms (e.g., OpenSea/IPFS) and integration constraints; supported implementation with PR reviews, documentation, and risk management across cross-functional teams.

EDUCATION/CERTIFICATIONS/SKILLS

Education: Bachelors in Computer Science — Thomas Edison State University

Certifications: AWS Certified Cloud Practitioner • AWS Solutions Architect Associate • Demo2Win • Winning by Design Revenue Architecture

Skills: Sales Engineering • Technical Discovery • Solution Architecture • Demo Storytelling • POV/POC • Technical Objection Handling • RFP/RFI & Security Questionnaires • APIs/Webhooks • SSO concepts (SAML/OIDC/OAuth) • Cloud (AWS) • Infrastructure as Code • CI/CD • Data/Analytics Foundations • JavaScript/React • Java/Spring • SQL • noSQL • BigData (Snowflake)
